1.3 - Analysis of Significant Trends

Output Expenses

The increases in annual departmental output expenses between 2018/19 and 2026/27 are due to new funding as a result of the Defence White Paper 2016, the Strategic Defence Policy Statement 2018, the Defence Capability Plan Review 2019, and the 2020 Baseline Review recommendations. This includes the introduction into service of new capabilities to enhance and maintain the outputs delivered by the New Zealand Defence Force. The increase from 2022/23 is due to Budget 2023 initiatives that have restored the depreciation baseline and provided support for remuneration and non-discretionary cost pressures.

Other factors impacting the period in review is new funding to enable the successful completion of components of the Defence Estate Regeneration and Consolidated Logistics Programmes, and increase in the capital charge as a result of the acquisition of the Boeing P-8A Poseidon aircraft for future air surveillance.

Multi-Category Expenses and Capital Expenditure

The underlying baseline has been constant since 2018/19 with movements in the MCAs as a result of the provision of Humanitarian Assistance and Disaster Relief (HADR) operations, operational deployments to United Nations, and Multi-National operations that contribute to New Zealand's Security, Stability and Interests. The increase in 2020/21 and 2021/22 is a result of the New Zealand Defence Force's delivery of isolation facilities and border services in support of the Government's response to the COVID-19 pandemic, through OP PROTECT. The decrease observed in 2022/23 is a result of these services and associated expenditure coming to an end.

Increases from 2023/24 onwards are due to the acquisition of the Boeing P-8A Poseidon aircraft to assist in ongoing resource and border protection.

Other Expenses

The other expense appropriations are higher in 2019/20 due to a one-off expense of \$3,184 million following a change in the accounting treatment to recognise the Veterans' Entitlements liability. The decrease in 2021/22 expenditure is a result of lower interest rates influencing the cost of the Veterans' Entitlements liability at that time. Subsequently interest rates have risen, and expenditure from 2022/23 onwards has increased.

Capital Expenditure

The capital expenditure appropriation between 2018/19 and 2026/27 reflects the agreed level of investment in the New Zealand Defence Force as a result of the Defence White Paper 2016, the Strategic Defence Policy Statement 2018, and the Defence Capability Plan Review 2019 recommendations. This includes introduction into service of new capabilities to enhance and maintain the outputs delivered by the New Zealand Defence Force.

The increased expenditure levels between 2020/21 and 2024/25 are primarily a result of funding being approved for the acquisition of the Boeing P-8A Poseidon aircraft for future air surveillance and the Lockheed Martin C-130J Hercules for future air mobility.

Benefits or Related Expenses

The decrease in annual Benefits or Related Expenses appropriations between 2018/19 and 2020/21 were primarily due to the Veteran services and payment appropriations being discontinued following a change in the accounting treatment of Veterans' Entitlements.

Part 2 - Details of Departmental Appropriations

2.1 - Departmental Output Expenses

Air Force Capabilities Prepared for Joint Operations and Other Tasks (M22) (A27)

Scope of Appropriation

This appropriation is limited to the generation of Air Force capabilities that achieve the levels of readiness for military operations and other tasks as directed by the Government of New Zealand.

Expenses and Revenue

	2022/23		2023/24
	Final Budgeted \$000	Estimated Actual \$000	Budget \$000
Total Appropriation	961,447	961,447	1,046,183
Revenue from the Crown	950,289	950,289	1,035,055
Revenue from Others	11,158	11,158	11,128

What is Intended to be Achieved with this Appropriation

This appropriation is intended to achieve the following:

- A surveillance and response capability prepared for counter sea operations in support of maritime warfare operations.
- A surveillance and response capability prepared for intelligence, surveillance and reconnaissance operations in support of maritime security operations.
- A naval air combat capability for embarkation in surface ships for maritime warfare and security operations.
- A surveillance and response capability prepared to support special operations forces in the land and maritime environments.
- A strategic air mobility capability prepared to deploy, sustain and recover deployed forces.
- A theatre air mobility capability prepared for personnel movement and cargo operations within a designated area of operations.
- A tactical air mobility capability prepared to support land operations, special operations forces, aeromedical evacuation and joint personnel recovery.

How Performance will be Assessed and End of Year Reporting Requirements

Assessment of Performance	2022/23		2023/24
	Final Budgeted Standard	Estimated Actual	Budget Standard
Percentage of Government directed readiness levels achieved and maintained to provide naval aviation operations capabilities prepared for maritime warfare and security operations (see Note 1)	85.7%	85.7%	100%
Percentage of Government directed readiness levels achieved and maintained to provide air surveillance and response capabilities prepared for counter sea and surveillance operations	29%	29%	100%
Percentage of Government directed readiness levels achieved and maintained to provide fixed wing theatre air mobility capabilities prepared for intra-theatre air transport and air manoeuvre operations	100%	100%	100%
Percentage of Government directed readiness levels achieved and maintained to provide tactical air mobility capabilities prepared for tactical air transport and air manoeuvre operations (see Note 2)	95%	95%	100%
Percentage of Government directed readiness levels achieved and maintained to provide strategic air mobility capabilities prepared for inter-theatre air transport operations	93.8%	93.8%	100%

The Budget Standard is the benchmark that the NZDF intends to measure its performance against in the coming financial year. There are a number of factors which may limit the NZDF's ability to reach this target including: personnel availability, training levels, and the availability of equipment and platforms, all of which have the potential to enhance or reduce the NZDF's performance over the year. Where this is known, the NZDF will provide an update to the expected levels of performance in Supplementary Estimates.

The standards for 2023/24 have returned to the benchmark, after reductions during 2022/23 which were due to:

Note 1 - Obsolescence-driven serviceability issues causing unavailability of SH-2G(I) Seasprite helicopters reducing naval aviation readiness.

Note 2 - Unserviceability of Boeing 757 engines reducing strategic air mobility readiness.

End of Year Performance Reporting

Performance information for this appropriation will be reported by the Chief of Defence Force in the NZDF Annual Report for the year ending 30 June 2024 to be presented to the House.

Reasons for Change in Appropriation

This appropriation increased by \$84.736 million to \$1,046.183 million for 2023/24 mainly due to increased funding of:

- \$70.088 million for the baseline roll out from 2022/23 to 2023/24 relating to the purchase of Boeing P-8A Poseidon aircraft
- \$27.274 million to support the Defence Force remuneration
- \$19.684 million for future air mobility capability, and
- \$12.128 million to correct a historical depreciation issue and for the increase in the depreciation expense as a result of the revaluation of assets, capital investments and committed capital expenditure.

The increases have been partially offset by decreases of \$50.500 million for the alignment of funding to the delivery of outputs.

- A combined arms land combat capability prepared to conduct global complex warfighting operations in a mid-intensity environment within a coalition in order to deter an aggressor from engaging in hostile activities.

Percentage of Government directed readiness levels achieved and maintained to provide land combat capabilities prepared for regional stabilisation operations (see Note 1)	33%	33%	100%

The Budget Standard is the benchmark that the NZDF intends to measure its performance against in the coming financial year. There are a number of factors which may limit the NZDF's ability to reach this target including: personnel availability, training levels, and the availability of equipment and platforms, all

of which have the potential to enhance or reduce the NZDF's performance over the year. Where this is known, the NZDF will provide an update to the expected levels of performance in Supplementary Estimates.

Note 1 - The standards for 2023/24 have returned to the benchmark, after reductions during 2022/23 which were due to:

- the impact of the prolonged deployment of Army in support of the All of Government response to COVID-19 resulting in the degradation of trained states, and
- unprecedented attrition having a significant impact on the ability to regenerate capability.

These performance delivery variations were pre-identified in the Schedule to the NZDF Annual Plan; Directed Outputs for 22/23.

End of Year Performance Reporting

Performance information for this appropriation will be reported by the Chief of Defence Force in the NZDF Annual Report for the year ending 30 June 2024 to be presented to the House.

The Budget Standard is the benchmark that the NZDF intends to measure its performance against in the coming financial year. There are a number of factors which may limit the NZDF's ability to reach this target including: personnel availability, training levels, and the availability of equipment and platforms, all of which have the potential to enhance or reduce the NZDF's performance over the year. Where this is known, the NZDF will provide an update to the expected levels of performance in Supplementary Estimates.

The standards for 2023/24 have returned to the benchmark, after reductions during 2022/23 which were due to:

Note 1 - The frigates HMNZS Te Kaha and Te Mana undergoing their introduction into service post the frigate system upgrade project. During this period they will have limited warfare and security capability.

Note 2 - High levels of attrition across the workforce resulting in Navy being unable to safely crew all platforms across the Naval Patrol Force. As a result, three of four naval patrol vessels have gone into extended readiness arrangements. The naval patrol effect has and will continue to be covered by the remaining fleet elements with some limits. Should the number of pre-planned taskings increase over the remainder of the financial year, this performance measure may see further reduction.

Note 3 - HMNZS Canterbury's force generation being impacted by emergent maintenance issues reducing the readiness for amphibious sealift capability.

End of Year Performance Reporting

Performance information for this appropriation will be reported by the Chief of Defence Force in the NZDF Annual Report for the year ending 30 June 2024 to be presented to the House.

The Budget Standard is the benchmark that the NZDF intends to measure its performance against in the coming financial year. There are a number of factors which may limit the NZDF's ability to reach this target including: personnel availability, training levels, and the availability of equipment and platforms, all of which have the potential to enhance or reduce the NZDF's performance over the year. Where this is known, the NZDF will provide an update to the expected levels of performance in Supplementary Estimates.

End of Year Performance Reporting

The Budget Standard is the benchmark that the NZDF intends to measure its performance against in the coming financial year. There are a number of factors which may limit the NZDF's ability to reach this target including: personnel availability, training levels, and the availability of equipment and platforms, all of which have the potential to enhance or reduce the NZDF's performance over the year. Where this is known, the NZDF will provide an update to the expected levels of performance in Supplementary Estimates.

End of Year Performance Reporting

Performance information for this appropriation will be reported by the Chief of Defence Force in the NZDF Annual Report for the year ended 30 June 2024 to be presented in the House.
